

PRODUCT CONTENT LABEL¹

Austin Energy’s GreenChoice® is sold in blocks of 100,000 kilowatt-hours (kWh) or matches 100% of your electricity usage. This table provides the renewable resource mix in GreenChoice in 2025 as well as the projected resource mix in 2026.

Green-e® Energy Eligible New² Renewables in GreenChoice

	2025 – Historical		2026 – Prospective	
	Percentage	Location	Percentage	Location
Wind	100%	Texas	67%	Texas
Solar	0%	Texas	33%	Texas
Total	100%	Texas	100%	Texas

1. Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before May 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased. Historical figures reflect the power delivered to Austin Energy GreenChoice customers in 2025.
2. New renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e® Energy. 2025 Renewable Energy Credits (RECs) retired on behalf of GreenChoice subscribers were generated from the following sources: Karankawa - Entered operation in 2019, Raymond - Entered operation in 2020, Pattern Gulf Wind - Repowered in 2021

For comparison, the mix of generation supplying Austin Energy for CY 2025 includes: Coal (10%), Natural Gas (16%), Nuclear (27%), Wind (30%), Solar (15%), and Biomass (2%). This resource mix was prepared from actual power generation from Austin Energy owned/purchased generation resources.

The average home in the Austin area uses about 860 kWh per month based on Austin Energy’s analysis.
