

AUSTIN ENERGY Contractor Disconnect Designee Application

This application is ONLY for Residential electric service rebuilds up to 350 amps.

Apply for the Austin Energy Contractor Disconnect Program online by sending this completed form and the signed Austin Energy Contractor Disconnect Program Terms and Conditions to AEDisconnectProgram@austinenergy.com.

This program will allow:

- **On Overhead services** – Master Electrician to cut Austin Energy seal and supply conductors in order to: upgrade and reconnect electric service (using Austin Energy approved splices), install transfer switches, main panel change out, and replace load side conductors.
- **On Underground services** – Master Electrician to replace load side conductors in the meter can, upgrade main panel and/or install transfer switches. **If the meter can will need to be replaced the project will not meet requirements for this program.**
- **If Austin Energy service drop conductors (line side) require extension for either type of service, the project will not meet requirements of program.**

In addition to completing this application, the Company employing the master electrician will need to agree to the AE Contractor Disconnect Program Terms and Conditions to be eligible for the Austin Energy Contractor Disconnect Program.
