Black Walnut
Native to Asia, its fruits are prized for their flavor.

Mexican Plum
A beautiful, drought-tolerant tree with tart cherry-to-small-plum-sized fruit.

Georgia Peach
High-quality, late-season peach.

Black Cherry
A tall, fast-growing native with white flowers in spring, red to black fruit in summer, and beautiful fall color.

Mulberry
Large, fast-growing shade tree with enough tasty fruit for wildlife and people to share.

Blackberry
An evergreen "bramble" with some of the first showy white flowers of spring, followed by the first fruit to ripen.

Prickly Pear Cactus
Native succulent with showy yellow flowers and deep purple or maroon fruits. Careful pruning, trellising and care of improved varieties are rewarded with abundant harvests of summer fruit.

Grapes
Carolina red, muscadine and more varietals are available, often with attractive fall foliage.

Other Recommended Fruit-Bearing Plants
Agava
A popular native San Antonio plant that produces a showy flower stalk in late spring.

Loquat
Small, attractive evergreen tree with tasty, tropical-flavored fruit in years with mild winters.

Pear
Easy to care for and productive. Trees display beautiful white blossoms in mid-spring.

Fig
A long-lived, evergreen shrub with tasty, juicy, purplish fruit that ripens over several months.

Plum
An easier-to-care-for relative of the peach. Attractive in the landscape and productive.

Jujube
An Asian native with small, apple-like fruit. A striking specimen tree.

Pomegranate
Deciduous small tree/large shrub with showy orange flowers and equally beautiful fruit throughout the summer.

Texas Persimmon
Small, native tree with aromatic fruit. Fruit ripens black with very sweet flesh and large seeds.

Japanese Persimmon
A small- to medium-sized deciduous tree with attractive, glossy leaves, interesting shape and large red-orange fruit.

Mexican Plum
A beautiful, drought-tolerant, native Mexican tree with tart cherry-to-small-plum-sized fruit.

Black Walnut
Similar in form to the pecan, its hard-shelled nuts are prized for baking.

Fig
Fragrant wood, large, showy foliage and sweet, exotic fruit combine in an easy-care, small tree.

Texas Persimmon
Small, native tree with aromatic fruit. Fruit ripens black with very sweet flesh and large seeds.

Che
A Chinese relative of the Mulberry with large, round red berries.

Pecan
Deservedly the State Tree of Texas. Superb shade and nut tree.

Jujube
An Asian native with small, apple-like fruit. A striking specimen tree.

Pawpaw
Eastern American native. A beautiful understory tree with clusters of banana-flavored fruit.

Loquat
Small, attractive evergreen tree with tasty, tropical-flavored fruit in years with mild winters.

Pear
Easy to care for and productive. Trees display beautiful white blossoms in mid-spring.
