

AUSTIN ENERGY TREE REPLACEMENT LIST

Trees are an integral part of the Austin landscape, providing shade and enjoyment for our citizens. However, trees and power lines do not mix. **Austin Energy, the City of Austin’s municipal electric utility, prunes trees away from the electric lines to provide safe and reliable electric service to all of our customers.** Sometimes, a tree cannot be effectively pruned away from the power line. In these instances, Austin Energy works with the property owner to remove the tree.

Listed below is a variety* of replacement trees that may be available from Austin Energy when we have to work on your trees. Remember, the key to enjoying the benefits of trees is to select the right tree and plant it in the right place. Austin Energy is dedicated to this philosophy and will work with our customers to implement this throughout our system.

COMMON NAME	BOTANICAL NAME	SUNLIGHT NEEDED	AT MATURITY		FOLIAGE	COMMENTS
