AUSTIN ENERGY

FEE SCHEDULE

Utility Charges/Rates

Cell Tower and Other Transmission and Substation Services

Annual Usage and Occupancy Charge		per contract
Austin Energy Support Personnel and Engineers (internal)	dir	ect costs plus overhead / g&a
Building Rooftop Fee	\$100.00	per square foot
Engineering / Design (external)		direct costs plus 15%
Equipment Upgrade Filing Fee	\$2,000.00	
Escort for high voltage/secure areas	di	rect costs plus overhead /g&a
Field Work / Construction / Site Maintenance (external)	•	direct costs plus 15%
Field Work / Construction / Site Maintenance (internal)	dir	ect costs plus overhead / g&a
Ground Space Fee	\$50.00	per square foot
High Voltage Clearance Lose of Use Fee	\$400.00	per hour
New Site Filing Fee	\$1,800.00	
Vehicle / Equipment Use (external)	•	direct costs plus 15%
Vehicle / Equipment Use (internal)		direct costs
Customer Call Center		
Account Records Fee	\$25.00	per hour
To research and or compile customer records, account information or billing information.		
Austin Energy Trip Fee	\$400	
 For: Follow-up trips required due to customer and or electricians actions that prevent Austin Energy from completing scheduled work on the first trip. Trips requested by customers and or electricians for service problems that are determined not to be the responsibility of Austin Energy. 		
Automated Meter Opt Out (monthly manual read fee)	\$10.00	
Automated Meter Opt Out (switch to manual meter)	\$75.00	
Broken Seal Fee	\$55.00	
To replace a broken meter seal; charged to the customer who could reasonably be expected to benefit from service received through the meter.		
Continuous Service Program Disconnect Fee	\$20.00	per disconnect
To disconnect service at the meter for owners and apartment managers participating in the continuous service program.		
Continuous Service Program Initiation Fee	\$20.00	per unit, one-time charge
For owners and apartment managers to enroll in the continuous service program.		upon joining the program
Customer Requested Meter Test Fee	\$25.00	
To test a meter upon a customer's request when a test at the address was performed during the preceding 36 months & over-registration is not in excess of industry standards.		
Initiation Fee	\$20.00	
To initiate new utility service; except for participants in the continuous service program.		
Meter Tampering Fee	\$850.00	
Tampered meters / Customer Initiated Unsafe		

FEE SCHEDULE

		Community Focused
Meter Tampering Fee	\$2,400.00	
Tampered Meters / Customer Initiated Unsafe Conditions — 1 Phase Non-Residential		
Meter Tampering Fee		Require 90-days worth
Tampering Fee for Repeaters		of usage deposit
Meter Tampering Fee	\$3,700.00	
Tampered Meters / Customer Initiated Unsafe Conditions — 3 Phase Non-Residential.		
Re-Initiation of Service Fee	\$25.00	
To re-initiate utility service at an address where a customer had previous service at the same address.		
Returned Payment Fee	\$30.00	
To process account payments that are returned, dishonored or denied by a bank, lender or third party payer.		
Utility Charges		
1 Phase Meter		direct costs plus 15%
Automated Meter (using radio wave transmission)		direct costs plus 15%
Broken Glass		direct costs plus 15%

Make Ready Assessment / Inspection (internal)	***************************************	direct cost plus overhead / g&a
Pole Attachments	***************************************	
Annual Usage and Occupancy Charge		per contract
Application Close Out Fee	\$50.00	per application
Pole Attachment Application Revision Filing	\$75.00	per revision
Pole Attachment Filing Fee	\$50.00	per pole
Post-Installation Inspections / Subsequent Inspections	•	direct cost plus overhead / g&a
Small Cell Networks — Network Node Application Fee	\$500.00	for the first five network nodes on an application
Additional Node	\$250.00	each, up to 30 per application
Node Pole	\$1,000.00	each
Wireless Attachments to Streetlighting (or other non-distribution service poles)	\$20.00	per year
Attachments to distribution poles will be billed at the FCC calculated rate.		
Transferring Licensee's Attachments (external)		direct cost plus 15%
Transferring Licensee's Attachments (internal)		direct costs plus overhead / g&a
Vehicle / Equipment Use (external)		direct cost plus 15%
Vehicle / Equipment Use (internal)		direct cost
Service Extensions / Switchovers		
Customer Switchover		at cost
For customers in a dually certified area all costs of disconnecting service shall be paid in advance of switchover, and customers must pay all current balances owed.	<u>.</u>	
Distributed Generation Application Fee	\$100.00	
Distributed Generation Inspection Fee — Residential	\$150.00	
Electric Service Application Fee	\$200.00	per review

AUSTIN ENERGY

Utility Information

Austin Analytical Services

Austin Analytical laboratory services can benefit other customers as well as the City of Austin. The laboratory is equipped to provide PCB, lead, asbestos, and other environmental and analytical testing to customers.

Construction/Installation

This service consists of pole or tower construction and conduit installation for electric or communications companies.

Distributed Generation

This service provides on-site analysis for large industrial or commercial customers to assess opportunities for on-site electrical generation for these customers for peak shaving or emergency outage situations. If circumstances for on-site generation are favorable, Austin Energy may provide or assist customers in obtaining distributed generation equipment. Austin Energy may own, operate, and/or maintain such equipment.

District Heating and Cooling Service

Austin Energy may provide district cooling service to customers under long-term service contracts. A contract shall be required to receive service, and Austin Energy may enter into such contracts to the extent system capacity is available. The customer's capacity and consumption charges shall be determined by the utility and imposed to recover connection costs over a period not to exceed fifteen-years; capital costs and a rate of return; fixed and variable operation, maintenance, replacement, power, and administrative costs, both specific to the customer and attributable to the customer's proportionate share of over-all system cost-of-service.

Additional Meter Fee — On-Site Energy Resources — Domain	\$50.00	per month
Additional Meter Fee — On-Site Energy Resources — Downtown	\$50.00	per month
Additional Meter Fee — On-Site Energy Resources — MEC	\$50.00	per month
Customer Data Link Rental Fee — On-Site Energy Resources — Domain	\$50.00	per month
Customer Data Link Rental Fee — On-Site Energy Resources — Downtown	\$50.00	per month
Customer Data Link Rental Fee — On-Site Energy Resources — MEC	\$50.00	per month
ECAD Data Reporting Fee — On-Site Energy Resources — Domain	\$25.00	per month
ECAD Data Reporting Fee — On-Site Energy Resources — Downtown	\$25.00	per month
ECAD Data Reporting Fee — On-Site Energy Resources — MEC	\$25.00	per month
Inspection Fee — On-Site Energy Resources — Domain	\$250.00	per additional visit after the first two inspections
Inspection Fee — On-Site Energy Resources — Downtown	\$250.00	per additional visit after the first two inspections
Inspection Fee — On-Site Energy Resources — MEC	\$250.00	per additional visit after the first two inspections
Load Profile Reporting Fee — On-Site Energy Resources — Domain	\$25.00	per month
Load Profile Reporting Fee — On-Site Energy Resources — Downtown	\$25.00	per month
Load Profile Reporting Fee — On-Site Energy Resources — MEC	\$25.00	per month
Reconnect Fee — On-Site Energy Resources — Domain	\$500.00	per occurence
Reconnect Fee — On-Site Energy Resources — Downtown	\$500.00	per occurence
Reconnect Fee — On-Site Energy Resources — MEC	\$500.00	per occurence

AUSTIN ENERGY FEE SCHEDULE

Educational Services

This service provides information and education on utility and competitive issues such as safety, power quality, planning and energy services.

Electric Reliability Council of Texas Wholesale Market Services

These services may be offered to eligible parties desiring to participate in the Electric Reliability Council of Texas (ERCOT) wholesale market. Austin Energy is currently registered as a Qualified Scheduling Entity in ERCOT and, as such, may provide scheduling, dispatching, communication, and a broad range of other services related to the ERCOT wholesale market.

Energy Management Services

Austin Energy — Austin Energy Fund Services include energy audits, feasibility studies, cost estimates, project management, providing, installing, and/or maintaining energy-efficient equipment, and arranging for project financing for governmental, commercial, and industrial customers.

Green Building Program

The Green Building Program is a voluntary building rating system that encourages environmentally sound building, remodeling, and building maintenance practices. This program includes those services connected with providing "green building" practices: professional consulting, educational and informational "green building" services, and marketing of the same, all connected with providing and promoting environmentally sound building practices and systems ("green building"). Green Building services are available to individuals and business outside the City of Austin's electric service area as well to businesses within the service area boundary.

Lighting Products and Services

This service includes the supply and installation of lights or poles for commercial facilities and residences. Lights and poles may be owned and maintained by the Utility.

Maintenance Contracts for Customer-Owned Medium-Voltage Equipment

This service provides specific maintenance contracts for customers requesting assistance in repairing or providing maintenance on medium-voltage equipment (over 600 volts). A maintenance contract will be prepared for each customer.

Power Quality or Reliability Contracting

This service provides contracts to improve customer power quality or reliability through the sale, lease, installation and maintenance of electrical devices. The final product or service offering will be based on that customer's specific needs.

Pricing Guidelines for Electric Utility Products and Services

The pricing of electric products and services shall be derived from a competition-based pricing strategy. Competition-based pricing, also known as going-rate pricing, shall correlate prices for Austin Energy electric utility products and services to those of competitors for like goods and services in Austin, Texas or similar marketplaces. By including market-based surveys in the pricing process, competition based pricing includes within the pricing calculation the consumer's perception of the value of the product or service. The competition-based prices for products and services shall be selected by combining two standard pricing data sets and using pricing based on marginal cost.

- The first pricing data set is the price range between the average lowest and average highest prices of the product
 or service. This price range shall be determined by researching the prices of the product or service in the current
 marketplace. Both internal and external market price surveys may be used. This range becomes the competition-based
 price range as established by competition in the market place.
- 2. The second pricing data set is the internally computed marginal cost of the product or service. Marginal cost is calculated by combining the determined total fixed and total variable costs to establish the floor of the profit margin.
- 3. The final price of the product or service shall not be offered below the marginal cost of the product or service and must be within the determined competition-based price range.
- 4. Calculation of the final price shall assume a product life cycle (to be determined for each product) for the purposes of determining the number of units or amount of service that will be sold.
- 5. The final price for a particular product or service shall be a ratio of the sum of the marginal cost and targeted profit to the anticipated number of units to be sold.

Competition-based pricing assumes that the selected price represents the collective pricing wisdom of the electric utility product and service marketplace. It reflects a price that affords a fair profit in a competitive marketplace.

Pulse Metering, Submetering, and Interval Load Data Services

This service provides installation of pulse metering, submetering, or interval load data recorders at a customer's facility, and electronic collection of relevant data from a customer's facility, and provides customers with timely operating data to assist with the efficient operation of its equipment and facility.

Surge Protection

This service provides whole building and point-of-use surge protection from voltage spikes. These products will be suitable for residential and commercial establishments. Customers have the option of choosing either whole building surge protection installed at the meter or high quality surge protection strips for individual or grouped devices, or both.
