

Austin Energy Electric Vehicles & Emerging Technologies

Opportunities for Electric Vehicle Charging at Multifamily Communities

www.pluginaustin.com // A City of Austin Program

Austin Energy is making plug-in electric vehicle ownership easier by offering convenient, green and affordable charging for apartment residents.

Charging Stations:

How does an electric vehicle “fill up?”

Plug-in electric vehicles can be charged from just about any source of electricity including a wall socket.

Level 1 Charging Station

- » Requires a 120 volt, standard wall outlet
- » Offers a slower charge with power similar to a kitchen appliance

Level 2 Charging Station*

- » Requires a 240 volt outlet
- » Offers a fast charge with power similar to a clothes dryer

* Austin Energy offers rebates for Level 1 and Level 2 charging stations.
City of Austin permits required for level 2.

Rebates

Austin Energy provides electric vehicle charging station rebates up to \$4,000 plus ongoing operational support. These rebates are available to help improve your bottom line and provide your residents with the newest, 21st century amenity.

Austin Energy rebates cover the following:

- » Up to 50% of the cost and installation of approved Level 1 (120 volt) and Level 2 (240 volt) charging stations
- » Cost of ongoing network licensing fees, electricity reimbursement, routine maintenance visits, and GreenChoice® renewable energy credits

Charging station hosts cover:

- » Upfront installation costs (rebate is applied after project is complete)
- » Non-warranty repair costs

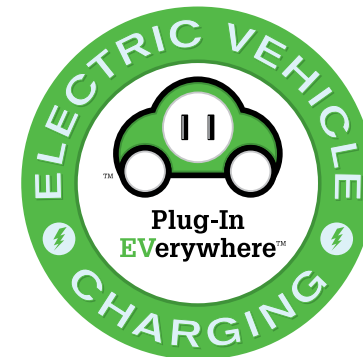

Rebates range from \$1000 to \$4000 per station; maximum rebates depend on the selected equipment and whether the station is installed in new construction or in an existing parking area.

A recent multifamily survey showed plug-in electric vehicle charging stations ranked #4 as a top amenity desired by residents.*

Benefits

Austin's plug-in electric vehicle market is increasing by 300% annually, making it a great time to offer your residents charging stations as an amenity.

- » Become part of a growing network of stations and be included on Austin charging station maps and mobile applications
- » Earn recognition for providing a highly visible, alternative transportation amenity
- » Residents have access to unlimited electric "fill-ups" at home and across town for under \$5 per month
- » May be eligible for an Austin Energy Green Building innovation point
- » Enjoy the benefit of a hassle-free amenity because Austin Energy provides operational support of your new station
- » Bonus: Properties receive an Electric Vehicle Charging decal to help promote your new amenity

* Multifamily Executive Magazine Latest Trends Sept. 2013.

Getting Started

Austin Energy offers personal service to help your property become part of our Plug-in Everywhere Network.

- » An Austin Energy representative will visit your property to discuss the options available to you.
- » You will receive a list of approved vendors for installation of your station
- » Austin Energy will advise on applying for rebates to ensure you receive the maximum benefit
