

2021 HISTORICAL PRODUCT CONTENT LABEL ¹

GreenChoice[®] is sold in blocks of 100,000 kilowatt-hours (kWh) or matches 100% of your electricity usage. In 2021, GreenChoice was made up of the following new renewable resources averaged annually.

Green-e [®] Energy Certified New ² Renewables in GreenChoice 2021		Generation Location
Wind	100%	Texas
Total Green-e [®] Energy Certified New Renewables	100%	Texas

1. These figures reflect the power delivered to GreenChoice customers in 2021 year.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved under a strict set of criteria as repowered.
3. Eligible hydroelectric facilities are defined in the Green-e[®] Renewable Energy Standard for Canada and the United States (<http://www.green-e.org/standard>) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org) or EcoLogo (www.ecologo.org); and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying Austin Energy includes: Coal (18%), Nuclear (24%), Natural Gas (16 %), and Renewables (41 %) This resource mix was prepared from actual power generation from Austin Energy owned/purchased generation resources.

The average home in the Austin area uses about 1,000 kWh per month based on Austin Energy's analysis.
